## SKILLS

Programming Languages: PYTHON, HTML, CSS, JAVASCRIPT  
Libraries/Frameworks: REACT.JS  
Tools / Platforms: FIGMA  
Databases: SQL

## PROJECTS / OPEN-SOURCE

### NETFLIX CLONE | [Link](#)

HTML, CSS, JAVA

A **Netflix Clone** is a **React-based streaming platform** that mimics Netflix's UI and functionality. It features user authentication, movie browsing, categories, and a video player with smooth animations. Dynamic content fetching from APIs (TMDb or custom backend) ensures real-time updates. The UI is fully responsive, with dark mode and intuitive navigation for a seamless user experience.

### QR CODE GENERATOR | [Link](#)

HTML, CSS, JAVA, API

This **QR Code Generator** is a simple web app that allows users to **convert text or URLs into QR codes**. Built with **HTML, CSS, and JavaScript**, it uses the **QRCode.js library** for dynamic code generation. Users can **enter text, click a button, and instantly see the QR code**. The app also **stores the last entered value in local storage** for convenience.
